Allowable Subject Matter

1. Claims 29, 31, 36-38 and 44-49 are allowed.
2. The following is an examiner's statements of reason for allowance:

The examiner has found that the prior art of record does not appear to teach or suggest or render obvious the claimed limitations in combination with the specific added limitations as recited in independent claims and subsequent dependent claims. The prior art of record fails to teach or suggest a method and system for managing an access to a private logical unit of a storage system wherein management computer includes a management table that stores a relation between a user name and logical unit identification information identifying a private logical unit of a user indicated by the user name, referring to the management table to find the logical unit identification information corresponding to the received user name and transmitting the received computer identification information associated with the received user name and found logical unit identification information to the storage system thereby to permit the computer identified by the received computer identification information to access the private logical unit identified by the received logical unit identification information. Thus, the concept of the claimed invention is different from and not taught by Blumenau, because each logical units of the claimed invention is a private logical unit of a predetermined user, but each of the logical units of Blumenau is a private logical unit of a predetermined host as argued by applicant [see Amendment filed on 24 February 2005 and Supplemental Amendment filed on 09 May 2005].

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Philip B. Tran whose telephone number is (571) 272-3991. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
5. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
